

Y. C. 1000
a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the still picture and information relating thereto are recorded on the first recording medium, a mode in which the moving picture is recorded on the second recording medium, and a mode in which the picture to be reproduced as the still picture is recorded on the second recording medium, said reproducing modes including a mode in which information relating to the still picture recorded on the first recording medium is displayed, a mode in which the moving picture recorded on the second recording medium is reproduced, a mode in which the picture recorded on the second recording medium so as to be reproduced as the still picture is reproduced, and a mode in which the still picture is reproduced out of the picture recorded as the moving picture on the second recording medium.

Sub D2
72
35. (Thrice Amended) A photographing apparatus comprising:
a first recording section for recording, on a first recording medium, mainly still pictures together with information relating to the still pictures thus recorded;
a second recording section capable of recording, on a second recording medium, moving pictures and still pictures; and
a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the still picture and information relating thereto are recorded on the first recording medium, a mode in which

57 and
the moving picture is recorded on the second recording medium, and a mode in which the still picture is recorded on the second recording medium, said reproducing modes including a mode in which information relating to the still picture recorded on the first recording medium is displayed, a mode in which the moving picture recorded on the second recording medium is reproduced, a mode in which the still picture recorded on the second recording medium is reproduced, and a mode in which the still picture is reproduced out of the picture recorded as the moving picture on the second recording medium.

Sub 23
39. (Thrice Amended) A photographic apparatus comprising:
a recording section capable of recording, on a recording medium, moving pictures and also pictures to be reproduced as still pictures;
a controller for controlling the photographing apparatus, which is operated by a voluntary operation of an operator, to selectively carry out a plurality of shooting and reproducing modes, said shooting modes including a mode in which the moving picture is recorded on the recording medium and a mode in which the picture to be reproduced as the still picture is recorded on the recording medium, said reproducing modes include a mode in which the moving picture recorded on the recording medium is reproduced, a mode in which the picture recorded on the recording medium so as to be reproduced as the still picture is reproduced, and a mode in which the still picture is reproduced out of the picture recorded as the moving picture on the recording medium; and
an aspect ratio selector for varying, in any of the modes in which the moving picture is recorded, an aspect ratio of the picture.
